Pray for Cambodia

The presence of three religions in Cambodia has historically posed a significant challenge to the spread of the Gospel. Today many are turning to Christ as the old ways provide no peace and no answers.

- Young pastors and their families who live sacrificially to impact their communities for Christ.
- Protection for pastors who are punished by their communities for sharing the hope we have in Christ.
- Spiritual growth and discipleship of each church.
- God's provision for pastors who are co-vocational and give sacrificially of their resources to care for those who are unwanted and unloved in the community.
- For resources to care for those who are unacceptable in the community - Often the church is the only community who cares for the cast aside.

Pray for a country that is closed and opposes people of faith.

- God is working through small local church plants where the legitimacy of the planters presence is to serve the community by engaging the community in a livelihood project.
- Success in the livelihood project - good health and reproduction for the animals and a strong market as the planter and the community become self-supporting through this means.
- For godly modeling of the few believers in each community.
- For significant conversations about faith with those who are open.
- For courage for those who want to follow Christ in the face of rejection by their families.
